

Sherman M4 A1 "Grizzly" Wisconsin

Battle tanks

The Sherman M4 tank was designed by the Americans to be simple, effective, fast, and easy to manufacture.

Today some twenty examples of the M4 A1 "Grizzly" in working order are listed, including half a dozen in France.

History

Production of the Sherman M4 A1 version totalled 6,281 from February 1942 to December 1943, out of a total of more than 49,000 Sherman tanks. The Sherman was the successor of the Grant M3 Medium Tank, retaining many of its components with modifications. However, it was less powerful than its German adversaries and its armour less effective. There were many variants of the Sherman, most concerning the production armament and the engine.

Our tank Wisconsin has been restored with care, in its strict original configuration. The engine is restored to as-new condition, and new tracks and wheels have been fitted. It is in perfect working order, with its contemporary accessories and equipment, and regularly takes part in commemorations.

This Tank Rent Sherman M4 A1 has all its documents: prefectural possession permit order, certificate of neutralisation (disarming).

Sherman M4 A1 “Grizzly” Wisconsin

Characteristics

GENERAL INFORMATION

American tank
 Manufacturer: Locomotive Works Montreal Canada
 Serial No.: #25610#

DIMENSIONS

Length: 6.19 m
 Width: 2.71 m
